Shade selection

Chromascop®

The Chromascop® shade guide is used to select tooth shades according to the Chromascop shade system. The 20 shades are divided into five clearly arranged shade groups.

Delivery forms

Chromascop shade guide	1x	529479
------------------------	----	--------

A-D shade guide with Bleach shades

The A-D shade guide is an instrument for the selection of tooth shades according to the A-D and Bleach shade system. The 16 basic shades in the shade groups A, B, C and D, supplemented by the 4 modern Bleach shades BL 1 to BL 4, are practical to use and represent the ideal tool for dentists and dental technicians.

Delivery forms

A-D shade guide		
Complete (16 and 4 shades)	1x	628587
Bleach (4 shades)	1x	628605

IPS® Natural Die Material shade guide

Determination of the preparation shade in the fabrication of all-ceramic restorations

The IPS Natural Die Material shade guide is used to determine the shade of the preparation. The shade is selected on the basis of the most severely discoloured part of the prepared tooth.

The IPS Natural Die Material allows you to fabricate a customized model die similar to the prepared tooth structure of the patient, with which you can then accurately select the shade and brightness of all-ceramic restorations.

Indications:

Determination of the preparation shade after tooth preparation

Benefits:

- ✓ Easy and accurate reproduction of shades due to having determined the preparation shade
- ✓ Fabrication of a customized model die
- ✓ Autoclavable shade guide

Shades:

9 (ND 1, ND 2, ND 3, ND 4, ND 5, ND 6, ND 7, ND 8, ND 9)

IPS e.max® Shade Navigation app

App for block, ingot and disc selection

The IPS e.max® Shade Navigation app is a helpful tool for selecting the appropriate block, ingot or disc.

It takes into consideration all the factors (tooth colour, indication, preparation shade, layer thickness and material type) that influence the overall shade of the restoration.

Indications:

For establishing the translucency and shade of:

- IPS e.max CAD
- IPS e.max ZirCAD
- IPS e.max Press

Benefits:

- ✓ Precise translucency and shade recommendations simplify the selection of blocks, ingots and discs.
- ✓ All the major influencing factors are taken into account (tooth shade, indication, preparation shade, layer thickness, material type).
- ✓ Direct, visual shade comparison with A–D shades

The app is available free of charge from the Apple App Store and can be downloaded on iOS smartphones and tablets.

Consulting apps

IvoSmile® for restorative dentistry, its follow-up product Ivoclar® Smile and IvoSmile® Orthodontics are consulting apps, specially designed for dental professionals, dentists and dental technicians.

These apps allow you to visualize the possibilities for esthetic dental makeovers on an Apple iPad*, directly with the patient, during the consultation.

The technology of these apps is based on augmented reality and superimposes live, in motion, the patient's own virtual mirror image with an initial impression of what they could look like if they had an esthetic dental makeover – an impressive and realistic experience.

Real-time visualization helps patients gain a clearer picture of the treatment goal. They will find it easier to decide whether or not to commit their time and money to the process of detailed cosmetic treatment planning.

Additionally, it is also possible to easily share the results of the real-time visualization with partner labs to provide additional information for the CAD modelling.

Fast portrait visualization with IvoSmile Orthodontics

The current dental situation is superimposed with a simulation of the new orthodontic improvements

Tooth shade and brightness settings for virtual teeth and gingiva

Stationary image or real-time 3D visualization of orthodontic simulation

IvoSmile app

Ivoclar Smile app

IvoSmile® app

Ivoclar Smile app

IvoSmile Orthodontics app

IvoSmile add-on

Available to download in the App Store (Apple)

742700

Show your patients the possibilities for enhancing their smile in a few short minutes – on your iPad* or iPhone*, at no obligation.

IvoSmile®

Use the IvoSmile app in your consultations and give your patients an initial impression of what they could look like if they had an esthetic dental makeover, with no obligation and with no time-consuming, costly photographs or mock-ups involved.

They will be enthusiastic about seeing before and after views of themselves and having the possibility of looking into a "virtual mirror" to see what they would look like with the prospective esthetic restoration in place. Eventually, they may feel more inspired to consider a smile makeover for themselves. IvoSmile includes a bleaching option to simulate bleached natural teeth.

IvoSmile® add-on

The IvoSmile add-on enables users to transfer personalized treatment options (3D model of the overall esthetics) to laboratories to allow for a face-specific CAD design. The aim is to optimize the CAD designs.

Technical requirements

Apple iPad* or iPhone* with software version iOS 14 or higher

Ivoclar Smile

Ivoclar Smile has been further optimized from its previous version, IvoSmile. Apart from the high user-friendliness, Ivoclar Smile is characterized by an improved visualization quality of potential treatment results, an adjusted business model and useful new features.

Ivoclar Smile supports users in a customized, customer-oriented consultation at the beginning of a procedure. In comparison to IvoSmile, Ivoclar Smile offers a more realistic visualization of potential treatment results, which may lead to enhanced patient motivation and easier treatment decision-making. Ivoclar Smile enables users to explain complex cases more effectively. The Ivoclar Smile app is furthermore distinguished by the following features:

- ✓ Ivoclar Smile offers a free-of-charge version with reduced features which is available for everyone interested (basic version).
- ✓ In-app purchases are available to buy further features (professional version).
- ✓ Besides offering the possibility of sharing pictures of the before-and-after screen, short videos of the patients with visualized treatment options can also be shared.

Technical requirements

Apple iPad* or iPhone* with software version iOS 14 or higher

IvoSmile® Orthodontics

The IvoSmile Orthodontics app allows you to give your patients a preview of the potential esthetic treatment outcome during the orthodontic consultation appointment, without any obligation. In difference to the IvoSmile app, the aim of IvoSmile Orthodontics is a face-specific visualization of the final CAD design. An intraoral scan is produced with 3Shape TRIOS® (as of generation 3). The pre-installed TRIOS Treatment Simulator (TTS) calculates a virtual set-up of the teeth. This information is transferred directly to the IvoSmile Orthodontics app via the 3Shape Communicate Portal. Innovative augmented reality technology is used to superimpose the potential treatment outcome on the digital mirror image of the patient – in real time while the patient speaks, smiles, or moves their head.

The virtual picture or video provides a lifelike 3D preview of the potential improvements to the patient's smile. Therefore, it may help the patient make the decision to go ahead with the treatment. The impressive before-and-after images and the possibility of viewing oneself with the new restorations in a virtual mirror is an exciting experience for patients and will make them think seriously about a smile makeover.

Dental care

Professional Care products

Plaque Test

Fluorescent disclosing liquid to reveal bacterial biofilm on the surfaces of natural and restored teeth or implants.

Benefits:

- ✓ Fluorescent under any curing light
- ✓ Easy handling
- ✓ No inconvenient staining of tongue and mucous membranes

Delivery forms

Refill	1 x 11 g	533299
--------	----------	--------

Proxyt®

The prophy paste system with defined Relative Dentin Abrasion (RDA) values enables professional cleaning and polishing of teeth, restorations and implants according to the individual needs of patients. The pastes contain xylitol, which inhibits the growth of the bacteria that cause caries.

– Containing fluoride

Proxyt coarse
Proxyt medium
Proxyt fine

– Fluoride-free

Proxyt medium

Benefits:

- ✓ Customized, gentle cleaning and polishing
- ✓ Scratch-free cleaning of sensitive surfaces using the fine Proxyt without pumice
- ✓ Smooth consistency, splatter-free formula
- ✓ Fresh peppermint taste

Delivery forms

Proxyt fine		703250
Proxyt medium		703252

Cervitec® F

The protective varnish with 1,400 ppm fluoride, chlorhexidine and CPC (cetylpyridinium chloride) for fluoride application and germ control in one working step.

Recommended application:

- Caries prevention in high-risk groups
- Fluoridation of dental enamel
- Remineralization of incipient lesions
- Protection of hypersensitive teeth
- Protection against bacterial activity

Benefits:

- ✓ Combined protection in high-risk cases
- ✓ Relatively high tolerance to moisture
- ✓ Mild taste
- ✓ Suitable for all age groups

Delivery forms*

Refill Tube (var. accessories)	1 x 7 g	665502
	2 x 7 g	665503
Refill Single Dose unit (var. accessories)	20 x 0.26 g	665504

* May vary from country to country

Cervitec® Plus

Chlorhexidine-containing protective varnish with 1% chlorhexidine plus 1% thymol for the professional bacterial control in patients with high caries risk. Cervitec® Plus also offers intensive protection in order to maintain the quality of restorations.

Areas of application:

- Protection of exposed root surfaces
- Treatment of hypersensitive teeth
- Reduction of bacterial activity on tooth surfaces

Benefits:

- ✓ Sealing of exposed dentinal tubules
- ✓ Targeted treatment of particularly susceptible areas
- ✓ Long-term availability of active ingredients
- ✓ Prevention of the side effects commonly associated with chlorhexidine
- ✓ Suitable for all age groups

Delivery forms*

Assortment Single Dose units (var. accessories)	20 x 0.25 g	602271
Assortment Tube (var. accessories)	1 x 7 g	602273
Refill Tube (var. accessories)	2 x 7 g	604661

* May vary from country to country

Cervitec® Liquid

Alcohol-free antimicrobial mouth rinse containing 0.1% chlorhexidine and xylitol plus essential oil.

Recommended application:

- As an intensive, temporary mouth rinse treatment
- To maintain the healthy condition of oral mucosa and gums as well as the dental supporting tissue
- Before and after implantological and periodontal interventions and dental and orthodontic surgery
- In the event of high caries risk
- In case of restricted ability to perform oral hygiene
- To prevent halitosis

Benefits:

- ✓ Reduction of bacterial growth
- ✓ High level of compliance due to mild taste
- ✓ Suitable for patients who need to avoid alcohol

Delivery forms*

Bottle	1 x 300 ml	707246
--------	------------	--------

* May vary from country to country

Cervitec® Gel

Oral care gel containing 0.2% chlorhexidine, 900 ppm fluoride, provitamin D-panthenol and xylitol.

Recommended application:

- As a concomitant measure in the prevention of diseases of the gums, oral mucous membrane and the peri-implant tissue
- As a concomitant measure in the management of inflammatory diseases such as gingivitis, mucositis, denture stomatitis, periodontitis or peri-implantitis
- In the case of elevated germ counts

Benefits:

- ✓ Provitamin D-panthenol and xylitol moisturize and soothe the gums and mucous membrane
- ✓ Smooth consistency – easy dispersion
- ✓ Mild taste

Delivery forms*

Tube	1 x 50 g	683123
	1 x 20 g	683125
Denture cleaning set		681411
Tube	1 x 20 g	
Storage container	1x	
Var. accessories		

* May vary from country to country

Fluor Protector S

Protective fluoride varnish for the desensitization of teeth and protection against dental caries and erosion.

Areas of application:

- Treatment of hypersensitive cervicals
- Build-up of dental enamel resistance against acid
- Long-term caries prevention
- Treatment of sensitivity after tooth whitening

Benefits:

- ✓ 7,700 ppm fluoride in a homogeneous solution
- ✓ Immediate fluoridation of enamel
- ✓ High-yielding fluoride depot
- ✓ Mild taste
- ✓ Suitable for all age groups

Delivery forms*

Refill Tube (var. accessories)	1 x 7 g	639520
	3 x 7 g	602273
Refill Single Dose unit (var. accessories)	20 x 0.26 g	639522

* May vary from country to country

Fluor Protector

Protective varnish containing fluoride for desensitization and caries prophylaxis.

Areas of application:

- Sealing of open dentinal tubules
- Inhibition of demineralization
- Stimulation of remineralization
- Remineralization of incipient caries lesions

Benefits:

- ✓ 1,000 ppm fluoride in a homogeneous solution
- ✓ Highly esthetic
- ✓ Excellent adhesion
- ✓ Suitable for all age groups
- ✓ Comprehensive clinical documentation

Delivery forms*

Ampoules		
Refill (var. accessories)	50 x 1 ml	533293

Fluor Protector Gel

The special gel with calcium, phosphate and fluoride for intensive but gentle dental care.

Recommended application:

- Special dental care to protect against caries, erosive wear and periodontal disease
- Sensitive teeth
- Exposed cervicals
- Acidic diets
- Dry mouth
- During orthodontic treatment
- After professional tooth cleaning
- During tooth whitening

Benefits:

- ✓ Calcium + 1,450 ppm fluoride + phosphate protect the teeth from acid attacks
- ✓ Xylitol inhibits the growth of cariogenic bacteria
- ✓ D-panthenol is soothing to the gums

Delivery forms*

Tube	1 x 20 g	628437
	1 x 50 g	628436

* May vary from country to country

Helioseal®, Helioseal® F Plus, Helioseal® Clear

Light-curing, resin-based fissure sealants for the preventive sealing of pits and fissures, using the enamel etching technique.

- **Helioseal®**
White-shaded sealant that permits easy control during application and at recalls
- **Helioseal® F Plus**
Efficient, white-shaded sealant with additional fluoride release
- **Helioseal® Clear**
Transparent sealant for excellent esthetic results and easy monitoring of fissures in case of doubt

Benefits:

- ✓ Precise application
- ✓ Well-proven in many years of clinical use
- ✓ Effective protection against caries

VivaSens®

Desensitizing varnish for hypersensitive teeth

Areas of application:

- Hypersensitive cervicals
- Hypersensitivities due to bleaching procedures
- Desensitization after professional tooth cleaning, scaling and root planing
- Dentin protection under restorative materials

Benefits:

- ✓ Long-term pain relief
- ✓ Quick to take effect
- ✓ Quick to apply
- ✓ Gentle to gums
- ✓ Free Stand Single Dose unit – free-standing with grip surface

Tooth whitening / Tooth jewellery

VivaStyle® Paint On Plus

A varnish system with 6% hydrogen peroxide for in-office and at-home use. Direct application with a brush - no trays required.

Areas of application:

- Whitening of vital and non-vital teeth

Benefits:

- ✓ Varnish system: for targeted use on the spot
- ✓ D-panthenol: provitamin
- ✓ Whitening: after just seven days
- ✓ In the dental office: intensive treatment

Delivery forms*

VivaStyle® 16%

A gel containing 16% carbamide peroxide (corresponds to 5.8% hydrogen peroxide) for at-home treatment. Ideal for the effective and gentle whitening of teeth. The product is applied with a customized tray.

Areas of application:

- Whitening of discoloured vital or non-vital teeth

Benefits:

- ✓ Smooth consistency
- ✓ Calibrated, resealable syringe
- ✓ For in-office and at-home use
- ✓ Quick and easy application
- ✓ Pleasant taste
- ✓ Clinically proven

Direct Restoratives

Moisture control

OptraGate®

The **latex-free** OptraGate® lip and cheek retractor allows the treatment field to be enlarged effectively and comfortably. OptraGate retracts the lips and cheeks gently and evenly over a large area, allowing a more effective relative isolation of the treatment field. OptraGate is comfortable to wear as it is three-dimensionally flexible. The improved padding of the lip and cheek retractor as well as the recesses to accommodate the upper and lower lip frenulum increase the patient comfort – even during longer treatment sessions.

OptraGate in the sizes Regular, Small and Junior is now available in two playful colours, blue and pink. The choice of colours is particularly interesting to children and adolescents and contributes to enhancing patient compliance.

Areas of application:

Suitable for use in diagnostic, preventive and therapeutic dental procedures (in particular restorative procedures, cavity preparation, professional tooth cleaning, diagnostic procedures, scaling & root planing, tooth whitening, impression taking).

Benefits:

- ✓ Efficient treatment and more effective relative isolation
- ✓ Enlarged treatment field and accessibility to the cavity
- ✓ Comfortable to wear for patients

Delivery forms

OptraDam® Plus

OptraDam® Plus is an anatomically shaped rubber dam for the absolute isolation of the working field. It offers the clinician increased visibility and accessibility. In addition, the device facilitates the evacuation of water spray. OptraDam Plus provides patient comfort and assists in keeping the patient's mouth open due to its three-dimensional flexibility.

Areas of application:

Suitable for use in therapeutic dental procedures for which an absolutely dry and isolated working field is required (e.g. for adhesive cementation, filling therapy and root canal treatments).

Benefits:

- ✓ Easy application thanks to the integrated frame and pre-printed arch template
- ✓ High patient comfort thanks to the flexible, three-dimensional design
- ✓ Simultaneous isolation of both arches thanks to the tension-free placement

Adhesives / Etchants

Adhese® Universal

The universal adhesive

Adhese® Universal is a single-component, light-cured adhesive for direct and indirect bonding procedures. It features compatibility with all etching techniques: self-etch, selective-enamel-etch and total-etch. Adhese Universal is available in the unique VivaPen® delivery form for fast and convenient direct intra oral application with minimal waste to optimize cost effectiveness.

- Direct-placed light-curing composites and compomer restorations
- Direct-placed core build-ups with light-, self- and dual-curing composites
- Adhesive cementation of indirect restorations with light- and dual-curing luting composites
- Repairs of fractured composite and compomer restorations
- Desensitization of hypersensitive cervical areas
- Sealing of prepared tooth surfaces before temporary/permanent cementation of indirect restorations

Benefits:

Esthetics

- ✓ Universally suitable for direct and indirect bonding procedures and all etching protocols

Quality

- ✓ High bonding strength (>25 MPa) on wet and dry dentin
- ✓ Minimal risk of postoperative sensitivity due to the integrated desensitizing effect

Efficiency

- ✓ Fast and convenient direct intraoral application with the ergonomic VivaPen®
- ✓ Efficient VivaPen delivery form provide almost 4 times more applications per ml compared to conventional bottles*
- ✓ Curing time of only 3 seconds with the 3s PowerCure range of products: for restorations in the posterior region of the permanent dentition (Class I and II) when light-cured from the occlusal aspect
- ✓ Up to 187 single applications with the VivaPen

* Data available on request

Adhese® Universal DC

Adhese® Universal DC is a universal, dual-curing single-component dental adhesive for enamel and dentin that is compatible with all etching techniques.

Adhese Universal DC is suitable for direct restorative procedures and the adhesive cementation of indirect restorations.

Adhese Universal DC can be used without light-curing for:

- the adhesive cementation of indirect restorations and endodontic posts with Variolink® Esthetic DC in conjunction with all etching techniques.
- the adhesive cementation of indirect restorations and endodontic posts using light- and dual-curing luting composites in conjunction with the etch & rinse technique.

Esthetics

- ✓ Universally suitable for direct and indirect bonding procedures and all etching protocols

Quality

- ✓ High bonding strength (>25 MPa) on wet and dry dentin
- ✓ Integrated desensitizing effect
- ✓ Offers the same advantages as the clinically proven Adhese Universal, with the added benefit of high bonding strength in conjunction with induced self-curing

Efficiency

- ✓ Curing time of only 3 seconds with the 3s PowerCure range of products: for restorations in the posterior region of permanent dentition (Class I and II) when light-cured from the occlusal aspect. Curing of all types of restorations in only 5 seconds.

Delivery forms

Refill Single Dose unit Regular	25 x 0.1 g	687778WW
Refill Single Dose unit Small/Endo	25 x 0.1 g	687779WW

Excite® F

Excite® F is a light-curing, fluoride-releasing single-component adhesive that is suitable for the total-etch technique.

- Direct light- and dual-cure composite and compomer restorations
- Adhesive luting of indirect restorations involving light-curing

Benefits:

- ✓ Available in bottles and Single Dose units
- ✓ High bond strength values on enamel and dentin
- ✓ Acetone-free (alcohol-based solvent)
- ✓ Fluoride release
- ✓ Storage at room temperature

Delivery forms

Refill Bottle	1 x 5 g	630375
Refill Bottle	2 x 5 g	630376
Refill Applicators regular (light blue)	50x	631699
Refill Single Dose unit	50 x 0.1 g	630377

Excite® F DSC

Excite® F DSC is a dual-curing, fluoride-releasing enamel and dentin adhesive that is suitable for the total-etch technique.

- Adhesive cementation of root canal posts
- Adhesive cementation of indirect, metal-free translucent restorations with dual- or self-curing luting composites
- Direct restorations and core build-ups with dual and self-curing composites

Benefits:

- ✓ Patented initiator-coated applicator brush
- ✓ Time-saving: one step, one coat
- ✓ No light-curing necessary
- ✓ High bond strength values on enamel and dentin
- ✓ Single-dose delivery form with applicators in two different sizes: Regular and Small/Endo
- ✓ Storage at room temperature

Delivery forms

Refill	50 x 0.1 g	
Regular		630378
Small/Endo		630380

Syntac®

Syntac® is the classic adhesive system for a chemically sound bond between the composite materials and the tooth structure.

- Direct composite and compomer restorations in the anterior and posterior region
- Adhesive cementation of indirect restorations made of composite and ceramic

Benefits:

- ✓ For direct and indirect restorations
- ✓ Clinically proven for many years
- ✓ Reduction of postoperative sensitivity
- ✓ Excellent instant bond between dentin/enamel and composite
- ✓ High bond strength
- ✓ Storage at room temperature

Delivery forms

Assortment		532891
Syntac Primer	1 x 3 g	
Syntac Adhesive	1 x 3 g	
Heliobond	1 x 6 g	
Var. accessories		
Refill Primer	1 x 3 g	532893
Refill Adhesive	1 x 3 g	532892

Heliobond

Heliobond is a light-curing single-component bonding agent to optimize enamel etching with all light-curing restorative materials.

- Adhesive for enamel bonding
- Together with Syntac also dentin bonding agent
- Cementation of tooth jewellery
- Transparent sealing of fissures and restorations
- As a bonding layer for the repair of composite, crown and bridge restorations

Benefits:

- ✓ For an optimum marginal seal between tooth and composite when applied in conjunction with the enamel etch technique.
- ✓ Storage at room temperature

Delivery forms

Refill	1 x 11 g	532906
Refill	1 x 6 g	532907

Total Etch

Total Etch is a 37% phosphoric acid gel.

- Partial etching technique for adhesive restorations
- Total-etch technique for adhesive restorations
- Fissure sealing
- Cementation of brackets and tooth jewellery
- Adhesive cementation

Benefits:

- ✓ The conventional etching gel with balanced handling properties
- ✓ Gel can be easily distinguished from the tooth structure
- ✓ Pre-bent metal tip for accurate application
- ✓ Jumbo delivery forms to keep adequate amounts of gel in stock

Delivery forms

Assortment Total Etch Jumbo		558530
Total Etch Jumbo	1 x 30 g	
Application tips, empty 2-ml syringe		
Refill	2 x 2 g	550588
Refill Etch application tips (blue)	20x	550587

Email Preparator blue

37% phosphoric acid in a liquid delivery form.

- Enamel etching and dentin conditioning for sealants, composite restorations, and for the adhesive cementation of restorations

Benefits:

- ✓ Micro-interlocking of Heliobond bonding agent with the etched enamel
- ✓ The material flows well into the fissures due to its low viscosity
- ✓ Reliable retention of the sealant, composite and the seated restoration

Delivery forms

Refill	1 x 6 g	533034

Composites

Tetric® Line

One solution for all cavities

The Tetric® line of products consists of four well-coordinated composite resins for your direct restorative needs.

Tetric® Prime is a sculptable universal composite and **Tetric EvoFlow®** is a flowable universal composite for anterior and posterior restorations.

Tetric® PowerFill is a sculptable composite and **Tetric® PowerFlow** is a flowable composite for 4-mm bulk placement in the posterior region. It offers short curing times from 3 seconds.

Ivoclar offers a kit containing 4 composites featuring 6 different types of materials that are intuitive to use. With this small range of materials, all types of cavities can be filled.

Each kit comprises:

- ✓ Tetric Prime – sculptable, for conventional layering techniques
- ✓ Tetric EvoFlow – flowable, for conventional layering techniques
- ✓ Tetric PowerFill – sculptable, application in increments of up to 4 mm
- ✓ Tetric PowerFlow – flowable, application in increments of up to 4 mm
- ✓ Adhese® Universal VivaPen – the universal adhesive system

Tetric® Prime

Tetric® Prime is a sculptable universal composite for anterior and posterior restorations.

Types of restorations

- Restoration of deciduous teeth
- Restorations in the posterior region (Classes I and II)
- Anterior restorations (Classes III, IV)
- Class V restorations
- Veneering of discoloured anterior teeth
- Splinting of mobile teeth
- Repair of composite/ceramic veneers

Benefits:

Esthetics

- Chameleon effect for a natural shade blend

Quality

- Proven clinical performance with over 730 million restorations placed worldwide^[1]
- Excellent handling in daily use^[2]

Efficiency

- 1 kit for all cavities

Shades:

- Dentin shades: A2, A3.5
- Enamel shades: A1, A2, A3, A3.5, A4, B1, B2, C2
- Highly translucent incisal shade: T
- Bleach shades: Bleach L

^[1] Based on sales figures.

^[2] Tetric Prime offers excellent handling properties.

Starting situation:
Defective mesio-palatal composite restoration in tooth 12

Final result

Dr Carola Pentelescu, Ivoclar Vivadent AG, Liechtenstein

Tetric EvoFlow®

Tetric EvoFlow® is the flowable universal composite for restorations in the anterior and posterior region.

The material can be used as a liner in Class I and II cavities and as a filling material for small and Class V cavities. It is effectively combined with regular-viscosity composite resins, e.g. Tetric Prime, Tetric PowerFill or IPS Empress® Direct.

Types of restorations:

- As initial layer under Class I to Class V restorations
- Class V restorations
- Small restorations of all types
- Extended fissure sealing
- Blocking out of undercuts
- Repair of composite resin restorations

Benefits:

Esthetics

- ✓ Pronounced chameleon effect for a natural shade blend

Quality

- ✓ Excellent handling properties to suit every situation

Efficiency

- ✓ 1 kit for all cavities

Shades:

- Dentin shades: A2, A3.5, B2
- Enamel shades: A1, A2, A3, A3.5, A4, B1, B3
- Highly translucent incisal shade: T
- Bleach shades: Bleach XL, Bleach L, Bleach M

Tetric® PowerFill

Tetric® PowerFill is a sculptable, light-curing, radiopaque 4-mm composite for direct restorative treatments in posterior teeth. It offers short curing times from 3 seconds.

Types of restorations:

- Restorations in the posterior region (Classes I and II, including the replacement of individual cusps)
- Reconstructive build-ups

Benefits:

Esthetics

- ✓ True-to-nature esthetics for posterior restorations
- ✓ Ivocerin® and the Aessencio® technology allow you to achieve the same high esthetics as with conventional composites

Quality

- ✓ Increased process reliability thanks to fewer layers

Efficiency

- ✓ Time savings of up to 51% in the posterior region^[1]

Shades:

Three enamel-like universal shades

- ^{IV}A Universal A shade
- ^{IV}B Universal B shade
- ^{IV}W White for light-coloured permanent teeth

Tetric EvoCeram®

Tetric EvoCeram® is a sculptable universal composite for restorations in the anterior and posterior region.

Types of restorations:

- Restoration of deciduous teeth
- Restorations in the posterior region (Classes I and II)
- Anterior restorations (Classes III, IV)
- Class V restorations
- Veneering of discoloured anterior teeth
- Splinting of mobile teeth
- Extended fissure sealing in molars and premolars
- Repair of composite/ceramic veneers
- Build-ups for transparent, removable Invisalign® orthodontic aligners

Benefits:

Esthetics

- ✓ Chameleon effect for a natural shade blend

Quality

- ✓ Proven clinical performance with over 730 million restorations placed worldwide^[1] and a clinical survival rate of 95%^[2]

Efficiency

- ✓ One solution for all cavities

Shades:

- Dentin shades: A2, A3.5, A4, B2

IPS Empress® Direct

IPS Empress® Direct is a highly esthetic composite for filling cavities in anterior and posterior teeth. It is available in five different translucency levels and in 32 different tooth shades. Therefore, different types of anatomical features can be faithfully reproduced.

Types of restorations:

- Anterior restorations (Classes III, IV)
- Posterior restorations (Class I and II)
- Class V restorations
- Correction of tooth position and tooth shape (e.g. diastema closure, closure of interdental triangles, lengthening of incisal edges);
- Direct veneers

Benefits:

Esthetics

- ✓ Lifelike shades for natural-looking restorations
- ✓ Easy application of shade nuances with Trans Opal

Quality

- ✓ Long-lasting esthetic results
- ✓ Convenient handling for sophisticated requirements

Efficiency

- ✓ Intuitive layering technique to achieve highly esthetic results in a few easy steps

Shades

- Dentin shades (Dentin):
A1, A2, A3, A3.5, A4, IVA5, IVA6, B1, B2, C3, D2, Bleach L, Bleach XL
- Enamel shades (Enamel):
A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C1, C2, C3, D2, D3, Bleach L, Bleach XL
- Translucent: Trans 20, Trans 30, Trans Opal

IPS Empress® Direct Effect

The flowable characterization material IPS Empress Direct Effect enables creative users to impart each restoration with an individual touch.

Types of restorations:

- Creating lifelike esthetic effects in the incisal area
- Anterior restorations (Classes III, IV)
- Small restorations of all types
- Repair of composite/ceramic veneers

Benefits:

- ✓ Ideal addition to the IPS Empress Direct range of materials for the creation of special effects in the anterior region
- ✓ Unique Trans Opal shade for a lifelike esthetic opalescence
- ✓ Lifelike translucency for the optimum reproduction of the incisal area
- ✓ Ideal consistency for contouring with the brush

Shades:

Trans Opal

Delivery forms

IPS Empress® Direct Color

For the lifelike characterizations, such as the imitation of enamel cracks.

Types of restorations:

- Individualized characterization of direct and lab-fabricated composite restorations
- For the masking of tooth discolourations
- For the characterization of chairside CAD/CAM veneers

Benefits:

- ✓ Lifelike characterization of demanding composite restorations and CAD/CAM-fabricated restorations
- ✓ User-friendly direct application; no dilution required
- ✓ High masking capability even when applied in thin layers
- ✓ 0.4-mm tip for precise application
- ✓ Ideally complements the IPS Empress® Direct and IPS Empress CAD range of materials

Shades:

White, honey, ochre, brown, blue, grey

Delivery forms

Refill	Possible use	1 x 1 g
white	<ul style="list-style-type: none"> • Imitation of white spots • Simulation of halo effects • Accentuation of cusps and ridges 	637899
honey	<ul style="list-style-type: none"> • Accentuation of the dentin core • Accentuation of fissures 	637900
ochre	<ul style="list-style-type: none"> • Imitation of individual enamel characteristics 	637903
blue	<ul style="list-style-type: none"> • Simulation of translucent enamel areas 	637901
grey	<ul style="list-style-type: none"> • Imitation of opalescent areas 	637905

Application tips ø 0.4 mm (black)		20x 634847

IPS Empress® Direct Opaque

IPS Empress® Direct Opaque is a light-curing opaquer suitable for masking exposed metal surfaces and discolourations.

Types of restorations:

Masking of:

- exposed metal surfaces when repairing defective ceramic and composite veneers intraorally
- discoloured tooth structure

Benefits:

- ✓ High masking capability even when applied in thin layers
- ✓ Universal opaque shade renders shade adjustments unnecessary

Shade:

Opaque

Alkasites

Cention® Forte & Cention® Primer

Cention Forte is a self-curing, radiopaque filling material with light-curing option for the direct restorative treatment of anterior and posterior teeth. Cention Forte belongs to the materials group of alkasites.

This filling material is considered to be the better alternative to amalgam than glass ionomer cement because of its reduced application protocol, high flexural strength and lifelike esthetics.

The alkaline filler of the material releases bioactive calcium ions, fluoride ions and hydroxide ions, which prevents demineralization and supports remineralization.

The ion release is much higher at an acidic pH value than it is at a neutral pH value. Acid attacks are thus neutralized much more quickly.

Cention Primer is a self-etching, self-curing primer for dental hard tissue, that has been especially designed for Cention Forte.

Delivery forms

OptraSculpt® Next Generation

OptraSculpt® Next Generation is a contouring instrument for the efficient contouring of composite restorations in the posterior region.

The two-component attachments produced in a special procedure facilitate the modelling of smooth and esthetic high-quality filling surfaces. The attachment shapes are specifically designed for the posterior region and allow for a natural-looking recreation of anatomical tooth structures such as cusp slopes, fissures and proximal margins.

Areas of application:

Suitable for adapting, shaping and contouring of uncured sculptable composite materials. Also suitable for lab composites.

Benefits:

- ✓ Three attachment shapes for the professional creation of demanding anatomical structures
- ✓ Optimum working angle for the posterior region
- ✓ Hygienic dispenser box for easy access to attachments

OptraSculpt® Pad

OptraSculpt® Pad is a contouring instrument with special foam pad attachments designed for the efficient, non-stick contouring and shaping of composites. The highly flexible synthetic foam pads optimally adjust to the anatomical contours and allow smooth modelling, without leaving any unwanted marks on the composite restoration.

Areas of application:

Suitable for adapting, shaping and contouring of uncured sculptable composite materials. Also suitable for lab composites.

Benefits:

- ✓ Anti-stick effect: reduced adhesion of the composite to the instrument
- ✓ Professional esthetics due to homogeneous surface design and reference scales on the instrument handle
- ✓ Reduced effort required for finishing and polishing

Reference scale on the instrument handle:
The continuous vertical lines show ideal average tooth widths, the dotted vertical lines average esthetic axial inclinations of the maxillary anterior teeth.

OptraStick®

OptraStick® is a placement instrument that features a flexible adhesive tip. The tip allows small objects, inlays, onlays and veneers made of various materials (e.g. IPS Empress®, IPS e.max®) to be picked up, held, carried and placed precisely, quickly and easily.

Benefits:

- ✓ Easy pick-up
- ✓ Strong adherence
- ✓ Secure positioning

Silamat® S6

Form and function – perfectly mixed

Areas of application:

Modern universal mixer for amalgam, glass ionomer cements and other predosed dental materials in capsules and injection capsules.

Benefits:

- ✓ Attractive design for the modern dental practice
- ✓ Thanks to its rounded shape and the removable cover, the unit can be cleaned easily
- ✓ Tried-and-tested Silamat technology
- ✓ Above-average speed of 4,500 rpm
- ✓ Special figure-of-eight pattern and patented mixing fork
- ✓ Compatible with all popular capsules and injection capsules in various shapes and sizes
- ✓ Three-year warranty
- ✓ Voltage 100 – 240 VAC

Delivery forms

Silamat® S6	100 – 240 VAC	602286

Light-polymerization units

Bluephase® PowerCure

The high-performance Bluephase® PowerCure features a light intensity of up to 3,000 mW/cm² and enables extremely short exposure times starting from 3 seconds.

Area of application:

Curing light for the polymerization of all popular light-curing dental materials in the wavelength range of 385–515 nm.

Benefits:

- ✓ Light intensity of up to 3,000 mW/cm² in the 3s Cure program for extremely short exposure times starting from 3 seconds
- ✓ Very short curing times from 3 seconds help save time and heighten efficiency (in conjunction with Adhese Universal, Tetric PowerFill and Tetric PowerFlow)
- ✓ Integrated intelligent Polyvision light-curing assistant
- ✓ Polywave LED with broad wavelength range of 385–515 nm, suitable for all popular dental materials
- ✓ Four programs:
 - 3s Cure: 3,000 mW/cm² – 3 seconds
 - Turbo: 2,000 mW/cm² – 5 seconds
 - High: 1,200 mW/cm² – 10, 15, 20 seconds
 - PreCure: 2 seconds
- ✓ PreCure program for the clean-up of excess cement
- ✓ Click&Cure corded operation for battery-independent use; includes radiometer
- ✓ Cordless design for ultimate mobility
- ✓ 10>9-mm light guide
- ✓ Short light guide: all tooth surfaces can be easily reached without the patient having to open their mouth extra wide
- ✓ Inductive charging prevents soiling of the charging contacts of the battery
- ✓ Battery status is visible from a far distance due to the clear charging indicator on the charging station
- ✓ High-performance lithium ion battery for a total of 20 minutes of operation in the HIGH mode
- ✓ Uniform polymerization due to homogeneous distribution of light throughout the entire light emission window of the light guide
- ✓ Backlit display
- ✓ Radiometer integrated in the charging station (optional)
- ✓ 3-year warranty (1-year warranty for battery)
- ✓ Available in grey

Bluephase® G4

Bluephase® G4 is the first Bluephase LED curing light featuring the personal and patented assistance system Polyvision.

Area of application:

The LED curing light of the 4th LED generation with a light intensity of 1,200 mW/cm² is used for the polymerization of all light-curing dental materials curing in the wavelength range of 385 – 515 nm.

Benefits:

- ✓ Integrated intelligent Polyvision light-curing assistant
- ✓ Broad wavelength range of 385 – 515 nm, suitable for all popular dental materials
- ✓ High light intensity of 1,200 mW/cm² for short exposure times starting from 10 seconds
- ✓ PreCure program for the removal of excess cement
- ✓ Click&Cure corded operation for battery-independent use
- ✓ Cordless design for ultimate mobility
- ✓ 10-mm light guide for time-saving one-time exposure
- ✓ Short light guide: all tooth surfaces can be easily reached without the patient having to open their mouth extra wide
- ✓ Inductive charging prevents soiling of the charging contacts of the battery
- ✓ Charging base with charging indicator permits recognition of the charging status from large distances
- ✓ High-performance lithium ion battery for a total of 20 minutes of operation in the HIGH mode
- ✓ Uniform polymerization due to homogeneous distribution of light throughout the entire light emission window of the light guide
- ✓ Backlit display
- ✓ Radiometer integrated in the charging station (optional)
- ✓ 3-year warranty (1-year warranty for battery)
- ✓ Available in grey, green, pink, blue

Bluephase® Meter II

The dental radiometer

Bluephase® Meter II is a precise dental radiometer for the quick and easy verification of the light intensity of all types of curing lights.

Area of application:

Enables exact and unrestricted verification of the light intensity in [mW/cm²] and the light output in [mW] of all curing lights in the wavelength range of 380 – 550 nm with an accuracy tolerance of ±10% as compared to the measurement with an integrating sphere.

Benefits:

- ✓ Innovative measuring principle offering an unprecedented measuring accuracy for dental radiometers
- ✓ Universally applicable for any curing light (halogen, plasma, LED devices, etc.)
- ✓ Integrated template to determine the diameter of circular light guides between 6–12 mm
- ✓ Additional program to determine the light output in milliwatt [mW] analogue to an integrating sphere
- ✓ Digital display
- ✓ Ergonomic and modern design
- ✓ 3-year warranty

Polishers

OptraGloss®

Efficient and advanced universal polishing system for the high-gloss polishing of composite filling materials and ceramic materials. A high-gloss finish and smooth surfaces are achieved in only one working step for composites and in only two steps for ceramics. OptraGloss polishers can be autoclaved and re-used.

Shapes:

- Flame PP
- Cup PP
- Lens PP
- Flame HP
- Cup HP
- Lens HP
- Spiral wheel HP

Areas of application:

- Clinical polishing of glass-ceramic, feldspathic-ceramic and oxide-ceramic restorations
- Clinical polishing of composite resin restorations

Benefits:

- ✓ Radiant high-gloss restoration surfaces in no time
- ✓ High wear resistance
- ✓ Autoclavable and reusable
- ✓ Two-step polishing system for ceramics

Prosthetics

Impression materials

Virtual®

Virtual® is the new line of vinyl polysiloxane impression materials specifically developed to meet the requirements of today's most popular impression taking techniques.

The Virtual line of products features the five viscosities Putty, Heavy Body, Monophase, Light Body and Extra Light Body in both "fast" (2:30 min.) and "regular" (4:30 min.) setting times.

Areas of application:

- Final impressions used for the fabrication of indirect restorations (crowns, bridges, inlays, onlays and veneers)
- Dental implant impressions
- Silicone matrices for wax-ups, study models or treatment planning
- Edentulous impressions
- Silicone matrices used to create temporary restorations

Benefits:

- ✓ Excellent adaptation to the moist oral hard and soft tissues
- ✓ Excellent displacement of moisture
- ✓ Exceptional readability and precision
- ✓ Variable setting times
- ✓ Fresh peppermint scent

Shades:

Sea blue: Virtual Putty, Virtual Heavy Body and Virtual Monophase

Caramel: Virtual Light Body and Virtual Extra Light Body

Virtual® 380

The two consistencies Heavy Body and Monophase are now offered as Virtual® 380 in large cartridges.

These XXL cartridges are used in mixing units such as Pentamix and MixStar, for example.

Benefits:

- ✓ Ready-to-use XXL cartridge – convenient handling
- ✓ Large, cost-efficient packages containing 380 ml of material

Virtual® CADbite

Virtual® CADbite is scannable and may be used for the optical recording of data when fabricating restorations using CAD/CAM technology. Virtual CADbite is an addition silicone, which may also be used for "conventional" bite registration techniques in conjunction with indirect restorative procedures. The material offers a thixotropic viscosity, high precision, a fast setting time with a final hardness of 32 Shore D and is dimensionally stable.

Benefits:

- ✓ **Fast**
As the material requires an intra oral set time of only 45 seconds, the risk of distortions and inaccuracies due to patient jaw movements are substantially reduced. At the same time, Virtual CADbite provides sufficient working time to allow full-arch bite registrations to be taken.
- ✓ **Strong**
Due to the material's high final hardness of 32 Shore D and high fracture toughness, Virtual CADbite registrations are easy to trim and grind. Moreover, undesirable shifts are prevented when adjusting the position of the casts in the articulator.
- ✓ **Scannable**
In response to the needs of CAD/CAM users across the globe, Virtual CADbite has been given a reflective surface. It delivers excellent results when capturing images with intraoral scanning devices.

Intraoral scanners and software

VivaScan®

VivaScan is the ideal solution for your entry into the world of digital dentistry. The VivaScan features laser technology of the next generation, which ensures precise scanning at superior speed. The user-friendly scan & send software solution allows dentists to capture digital impressions and transfer the data to their laboratory in a fast and streamlined workflow. VivaScan and Ivoclar Cloud connect dentists and dental labs and optimize their cooperation.

Benefits:

- ✓ Lightweight and ergonomic design: VivaScan is compact in size for a flexible scanning experience. Its slim, lightweight and ergonomic design makes scanning an effortless task.
- ✓ Plug & play function: The device's plug & play function allows you to use VivaScan as a portable system. The scanner simply needs to be connected to a laptop for it to work. This makes using VivaScan extremely easy.
- ✓ Two tip sizes: VivaScan comes with two different-sized tips (regular and small), which allow you to determine the best fit for every patient so that their scanning appointment will be as comfortable as possible.
- ✓ Two-button function: This function allows you a touch-free operation of the laptop during the scanning process on the patient. High speed provides a fast scanning experience and helps you to treat a larger number of patients without wasting time or consumables.
- ✓ True colour scan: The true colour scans produced with VivaScan help your laboratory to design and fabricate restorations precisely. Consequently, you can provide your patients with excellent fitting restorations^[1], which will make you and your patients smile.
- ✓ Integrated HD camera: The integrated HD camera makes your work easier due to high-resolution photographs and the case documentation.

Milling machines and software

PrograMill® PM7

If you are looking for efficiency and performance, then the high-performance PrograMill® PM7 is the right choice for you. This machine is suitable for a versatile variety of materials and applications in wet and dry milling processes.

Equipped with a high-performance spindle, the high-power 5-axis milling machine efficiently produces restorations that are distinguished by their outstanding surface quality and excellent accuracy of fit.

PrograMill® DRY

PrograMill® DRY is a compact 5-axis dry milling machine and combines coordinated processes with high-quality materials, mature technologies and comfortable handling.

Thanks to its compact design, the mill scores highly on flexibility. The machine manufactures crowns and bridges from zirconium oxide and innovative digital denture solutions from PMMA materials, such as full dentures from the Ivotion discs.

The mill also features a quick clamping system that can be operated with just one hand and without the need for additional tools, making changing materials intuitive and simple.

CAM software

The CAM software presents the interface between the design software and the milling machine and plays a crucial role. The CAM software converts design data into milling data and calculates the required milling paths. The milling strategies have a decisive influence on the quality and accuracy of fit of the restorations and can be flexibly adjusted to meet customer needs.

PrograMill® CAM V4

The software PrograMill CAM V4, which is adapted to the PrograMill® milling machines, utilizes the entire potential of the milling machines. The software is distinguished by its very short calculation times and the 5-axis simultaneous control of the machine.

Includes all necessary licences for the PrograMill milling machines

- ✓ Milling and grinding Ivoclar materials included
- ✓ Wet processing of IPS e.max CAD included
- ✓ Open for third-party materials
- ✓ Flexible upgrade options

PrograMill® material holders

Powerful holders for the PrograMill® machines PM7, PM5 and PM3 have been developed to ensure optimum processing of Ivoclar Digital CAD/CAM materials.

PrograMill® disc holder

A powerful holder has been developed for the PrograMill machines PM7, PM5 and PM3, which is distinguished by its zero-point clamping system. It ensures the optimum processing of discs with a circumferential groove of 10 mm.

The secure fit of all material discs results in high-quality milling results.

Delivery forms

PrograMill® disc holder for PM7/PM5/PM37	1 pc.	691953
--	-------	--------

Digital Denture holder

A special ring has been developed to modify the PrograMill disc holder for the Digital Denture process. It allows Ivotion to be secured in a predefined position and an already processed disc to be re-positioned accurately.

A denture, which has already been milled from the upper side, can therefore be easily removed so that the prefabricated teeth can be adhesively secured in place and then re-positioned for further processing.

Delivery forms

Digital Denture holder ring for PM7/PM5/PM3	1 pc.	689245
---	-------	--------

IPS e.matrix®

The patented multi-holder IPS e.matrix for PM7/PM5/PM3 enables up to six blocks to be milled in one grinding sequence, depending on the block size.

The IPS e.matrix for PM7/PM5/PM3 can be easily removed from the materials magazine and can be conveniently loaded outside the unit. The multi-holder is ideally adapted to the PrograMill machining strategies.

Delivery forms

PrograMill® abutment holder for NT-trading

The PrograMill® abutment holder for NT-trading has been exclusively developed for the PrograMill PM7 milling machine and is suitable for a comprehensive range of implant interfaces.

The holder allows you to mill highly precise, individual abutments using titanium preforms.

Processing begins right after having inserted the holder into the milling machine. Calibration is not required.

CAD/CAM blocks

IPS e.max® CAD

Lithium disilicate glass-ceramics (LS₂)

IPS e.max® CAD is the best-selling glass-ceramic^[1] worldwide. The material enables the efficient fabrication of full-contour restorations. It is distinguished by its flexibility, versatile field of applications and processing options and its high strength of 530 MPa^[2].

Both its esthetic properties and durability have been confirmed in everyday clinical practice.^[3-5]

Processing options:

"Blue" restorations can be:

- polished and crystallized
- glazed and crystallized in a single step
- stained, glazed and crystallized in a single step

Types of restorations:

- Minimally invasive crowns (1 mm)^[6]
- crowns
- Three-unit bridges (up to the second premolar as the terminal abutment)
- Implant-supported hybrid abutment restorations (hybrid abutments^[7], hybrid abutment crowns)
- Veneers and occlusal veneers
- Inlays, onlays, partial crowns

Benefits:

- ✓ Excellent esthetics and high flexural strength of 530 MPa^[2]
- ✓ 97.2% survival rate of posterior crowns over a period of 10 years^[8]
- ✓ Efficient grinding and crystallization of posterior crowns in only 19:17 minutes^[9]
- ✓ Broad spectrum of restorations for your chairside CAD/CAM applications
- ✓ 10-year guarantee
- ✓ Suitable for conventional, adhesive or self-adhesive cementation techniques

Block sizes^[7]:

- 6 (I12, C14, C16, B32, B40 and B40 L) and 2 abutment block sizes (A14, A16)

Translucency levels^[7]:

- 4 levels and 2 Impulse blocks (HT – High Translucency, MT – Medium Translucency, LT – Low Translucency, MO – Medium Opacity)

Shades^[7]:

- Comprehensive range of shades: in A–D and BL shades (the range of shades varies depending on the translucency level), see page 124.

Authorized CAD/CAM systems:

- ✓ **Ivoclar:**
 - PrograMill® PM3 / PM5 / PM7 / One
 - Zenotec® select hybrid
- ✓ **Amann Girrbach:**
 - ceramill® mikro ic,
 - ceramill® motion 2 / motion 3 /drs
 - ceramill® matik
- ✓ **Planmeca:**
 - PlanMill® 30 S / 40 / 40 S
- ✓ **Dentsply Sirona:**
 - inLab® MC XL / MC X5
 - CEREC® MC / MC X / MC XL / Primemill

^[1] Based on global sales figures.

^[2] Average biaxial flexural strength; outcome after more than 10 years of ongoing quality testing, R&D Ivoclar, Schaan.

^[3] Fasbinder D. J et al., Study report, 2017b.

^[4] Rauch A et al., Clin. Oral Investig. 2018, 22, p. 1763-1769.

^[5] Boldt J, Spitznagel F. A, Dtsch. Zahnärztl. Z. 2017, 72 (4), p. 319-325.

^[6] Long-term clinical evidence and the material's high strength allows the recommendation for crowns with a minimum layer thickness of 1 mm in combination with an adhesive cementation method.

^[7] The offering varies, depending on the CAD/CAM system being used.

^[8] The survival rate of monolithic IPS e.max CAD posterior crowns was evaluated with the Kaplan-Meier method. The failure rate refers to technical failures such as fractures and chipping, R&D Ivoclar, Schaan.

^[9] Average grinding time of three posterior crowns, 08:07 minutes (CEREC Primemill, fast grinding mode), followed by superspeed crystallization in the Programat CS6, 11:10 minutes (HT, MT, LT / glaze spray or polishing technique), maximal two restorations, R&D Ivoclar, Schaan.

IPS e.max® ZirCAD

Zirconium oxide ceramics (ZrO₂)

IPS e.max® ZirCAD allows dental professionals to produce esthetic, monolithic zirconia restorations efficiently in the dental practice with the help of efficient speed sintering programs.

Two groups of materials combined into one – this is what makes IPS e.max ZirCAD MT Multi special: translucent 5Y-TZP zirconium oxide provides high translucency for the incisal zone and the more opaque 4Y-TZP zirconium oxide provides high stability in the dentin zone.

In addition, the material features a gradual progression of shade and translucency, consisting of 60% dentin, 20% transition and 20% incisal zone. This distribution reflects the natural progression from dentin to incisal and imparts natural esthetic appearance to the restorations, even if no characterizations are applied^[3].

Processing options:

After the sintering procedure, restorations can be

- glazed and fired
- optionally: stained, glazed and fired
- polished

Types of restorations:

- Crowns
- Three-unit bridges

Benefits:

- ✓ High strengths of 1200 MPa (LT^[1]) and 850 MPa (MT Multi^[2]) allow reduced wall thicknesses and conservative preparation methods.
- ✓ Natural progression of shade and translucency deliver true-to-nature esthetic results in conjunction with MT Multi^[3]
- ✓ Natural fluorescence can be achieved with IPS e.max CAD Crystall./Glaze Fluo paste^[3]
- ✓ 10-year guarantee
- ✓ Conventional, adhesive or self-adhesive cementation

Block sizes:

- 2 (C17 and B45)

Translucency levels:

- 1 and 1 MT Multi block (MT Multi – Medium Translucency, LT – Low Translucency)

Shades:

- 8 (BL or BL1, A1, A2, A3, B1, B2, C2, D2)

IPS Empress® CAD

Leucite glass-ceramics

IPS Empress® CAD is associated with over 20 years of successful clinical performance. It closely reproduces the natural tooth structure due to its distinct chameleon effect and lifelike fluorescence.^[1]

IPS Empress CAD is known for exceptional esthetics and can be polished to a high gloss quickly and easily: grind – polish – done.

The innovative polychromatic IPS Empress CAD Multi AZ block is a special highlight in this range. The block features a natural progression of shade and fluorescence from dentin to incisal.^[1]

see p. 73

Processing options:

After the grinding process, the restorations can be:

- polished
- optionally: stained, glazed

Types of restorations:

- Crowns
- Inlays, onlays, partial crowns
- Veneers

Benefits:

- ✓ Highly esthetic restorations, efficiently created
- ✓ Clinically proven ceramic material with a flexural strength of 185 MPa^[2]
- ✓ Optimum adjustment to the natural tooth structure due to the chameleon effect

Block sizes:

- 4 (I10, I12, C14, C14 L)

Translucency levels:

- 2 and Multi block (HT – High Translucency, LT – Low Translucency)

Shades:

- Comprehensive range of shades: available in A–D and BL shades (the range of shades varies depending on the translucency level and block size) see page 75

Tetric® CAD

Composite

Tetric CAD is an esthetic composite block for the efficient fabrication of single-tooth restorations (flexural strength: 272 MPa^[1]).

Due to the pronounced chameleon effect, Tetric CAD restorations blend in with the residual tooth structure in an optically pleasing manner.^[2]

The restoration is polished after milling and then seated using an adhesive cementation protocol. This processing technique is very efficient and leads to an esthetic result quickly and easily.

Processing options:

After the grinding process, the restorations can be:

- polished
- optionally: characterized

Types of restorations:

- Veneers
- Inlays
- Onlays (e.g. occlusal veneers, partial crowns)
- Crowns

Benefits:

- ✓ Natural integration into the oral environment due to the unique chameleon effect²⁾
- ✓ Excellent polishability and intraoral repairability
- ✓ Easy and efficient processing
- ✓ Stability in limited layer thicknesses; restorations with thinly tapered margins possible
- ✓ Durable bond due to coordinated luting system

Block sizes:

- C14

Translucency levels:

- 2 (HT – High Translucency, MT – Medium Translucency)

Shades:

- 5 (BL, A1, A2, A3, A3.5; the shade offering varies, depending on the translucency level)

Authorized CAD/CAM systems:

Telio® CAD

Cross-linked PMMA material

Telio CAD are cross-linked PMMA blocks for the efficient fabrication of long-term temporaries (flexural strength: 135 MPa^[1]).

As a result of an optimized manufacturing process, the restorations feature a smooth surface that can be quickly and efficiently polished.

Processing options:

After the milling process, the restorations can be

- polished
- optionally: characterized

Types of restorations:

- Temporary crowns
- Temporary bridges with up to two connected pontics
- Implant-supported temporary hybrid abutment crowns

Benefits:

- ✓ High material homogeneity and process reliability result in fewer mixing errors and air entrapments compared with conventional methods
- ✓ Durable shade stability and lifelike fluorescence^[2]
- ✓ Excellent polishability
- ✓ Economical fabrication of temporaries

Block sizes:

Implant prosthetics

From temporary to permanent restoration

The IPS e.max® CAD and Telio® CAD blocks feature a pre-fabricated interface to facilitate direct cementation to a titanium bonding base. So, implant-supported hybrid abutments and hybrid abutment crowns can be created at chairside using clinically proven products^[1-4].

Cementation is achieved with the self-curing Multilink® Hybrid Abutment luting composite.

Types of restorations:

- **Telio CAD**
Implant-supported temporary hybrid abutment crowns
- **IPS e.max CAD**
Implant-supported hybrid solutions (hybrid abutments, hybrid abutment crowns)^[4]

Benefits:

- **Telio CAD**

Multilink® Hybrid Abutment

Multilink® Hybrid Abutment is a self-curing luting composite for the permanent cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Area of application:

Extraoral cementation of lithium disilicate (LS₂) glass-ceramic and zirconium oxide ceramic structures (abutment and abutment crowns) on implant sleeves made of titanium/titanium alloy and zirconium oxide.

Benefits:

- ✓ High bonding strength for a reliable cementation
- ✓ Straightforward handling due to the convenient automix syringe

Accessories

IPS® Object Fix Flow / IPS® Object Putty

Auxiliary firing pastes with varying viscosity to support all-ceramic restorations (especially IPS e.max® CAD) during firing and crystallization. The pastes are used to stabilize and secure the restorations on the silicon nitride support pins or directly on the silicon nitride firing tray. The pastes are easy to apply and remove after the firing procedure.

Delivery forms

IPS® Object Fix Flow	1 x 10 ml	605525
IPS® Object Fix Putty	1 x 10 g	605526

IPS e.max® CAD Crystallization Tray / IPS Speed Tray

The IPS e.max® CAD Crystallization Tray is a firing tray for the crystallization of IPS e.max CAD restorations as well as for the stains and/or glaze firing of IPS Empress® CAD, IPS e.max CAD and IPS e.max ZirCAD restorations with the IPS e.max CAD Crystall./materials.

The IPS Speed Tray is required for the speed crystallization of IPS e.max CAD.

To carry out the firing, the restorations are placed on the IPS e.max CAD Crystallization Pins supplied with the tray.

Area of application:

- IPS e.max CAD
- IPS e.max ZirCAD
- IPS Empress CAD

Sizes:

Universal stains and glazes

IPS e.max® CAD Crystall./Shades/Stains and Glaze

Universal range of stains and glazes

IPS e.max® CAD Crystall./Shades, Stains and Glaze is a universal range of stains and glazes designed for use with IPS e.max CAD, IPS e.max ZirCAD and IPS Empress® CAD.

The glazing paste is available as a variant with and without a fluorescent effect^[1].

Minor corrections (e.g. proximal contact areas) can be applied to IPS e.max CAD and IPS e.max ZirCAD restorations using IPS e.max CAD Crystall./Add-On.

Types of restorations:

- IPS e.max CAD
- IPS e.max ZirCAD
- IPS Empress CAD

Benefits:

- ✓ Reduced stock, lower costs – a single range suitable for all CAD/CAM chairside ceramics from Ivoclar
- ✓ Familiar application methods and consistently high quality
- ✓ Glazing paste with and without a fluorescent effect^[1]
- ✓ Possibility of making corrections (e.g. proximal contact areas) using Add-On material

Shades:

- 7 shades (0, 1, 2, 3, 4, Incisal 1, Incisal 2)
- 7 stains (white, cream, sunset, copper, olive, khaki, mahogany)

Cementation

Variolink® Esthetic

Variolink® Esthetic is a versatile and esthetic light- and dual-cure luting composite for the permanent seating of all types of restorations and materials.

Areas of application:

– Variolink Esthetic LC

- Permanent adhesive luting of glass-ceramic, lithium disilicate glass-ceramic and composite restorations (inlays, onlays and veneers).
- Only use Variolink Esthetic LC for restorations with a low thickness of <2mm that have sufficient translucency (e.g. IPS e.max® HT).

– Variolink Esthetic DC

- Permanent adhesive luting of glass-ceramic, lithium disilicate glass-ceramic and composite resin restorations (inlays, onlays, partial crowns, crowns, bridges)
- Restorations made of opaque ceramics, e.g. oxide ceramics, can only be permanently cemented if an adhesive that is separately light-cured is additionally used.

Benefits:

- ✓ Straightforward Effect shade range
- ✓ Proven and reliable shade stability^[1]
- ✓ Easy excess removal^[2]
- ✓ Flexible, situational consistency^[2] – ideal combination of flowability and stability
- ✓ Ideal bonding to the dental hard tissue with Adhese® Universal^[3–5]
- ✓ Reliable bonding to the restoration with Monobond® Plus^[4, 5, 6]

ZirCAD® Cement^[1]

ZirCAD® Cement is a new high performance resin modified glass ionomer cement designed for everyday use. It is ideal for high-strength restorations, especially zirconia. ZirCAD Cement allows the clinician to deliver predictable cementation results case after case with its easy handling and quick clean-up.

Areas of application:

Cementation of restorations based on retentive preparations

- Crowns, bridges, inlays and onlays made of high-strength ceramics
- Metal-based crowns, bridges, inlays and onlays
- Metal, ceramic and glass-fibre reinforced composite posts

Benefits:

- ✓ Quick and easy clean-up in the gel phase, can be expedited with the optional tack cure
- ✓ The simple way to cement zirconia and metal-based restorations
- ✓ Continuous fluoride release
- ✓ Moisture and acid resistant
- ✓ Low film thickness for an accurate marginal fit
- ✓ Single-product cement without primer or conditioner

Delivery forms

^[1] Only available in countries of the European Union, Liechtenstein, Great Britain and Norway

SpeedCEM® Plus

SpeedCEM® Plus is a self-adhesive, self-curing resin cement with optional light-curing. The material offers an ideal combination of performance and user-friendliness. Its formulation has been optimized to make it particularly suitable for use in conjunction with restorations made of zirconium oxide and metal-ceramics and for the cementation of restorations on implant abutments.

Areas of application:

SpeedCEM Plus is suited for the permanent seating of crowns and bridges on natural teeth and on implant abutments that are made of the following restorative materials:

- Oxide ceramics such as zirconium oxide, e.g. IPS e.max® ZirCAD
- Metal and metal-based restorations
- Lithium disilicate glass-ceramics, e.g. IPS e.max®

Benefits:

- ✓ Excellent self-cure performance
- ✓ User-friendly handling
- ✓ Easy clean-up
- ✓ Tolerant processing
- ✓ High radiopacity
- ✓ Efficient process

Multilink® Automix

Multilink® Automix is a luting composite for the permanent adhesive cementation of indirect restorations made of silicate and oxide ceramics, metal and metal-ceramics (PFM) and composite resins. Used together with the matching Multilink Primers A and B, the material generates a strong and long-lasting bond to the tooth structure.

Areas of application:

Cementation of indirect restorations (inlays, onlays, crowns, bridges, endodontic posts) made of:

- metal and metal ceramics (PFM)
- all-ceramics (silicate)
- reinforced all-ceramics (zirconium and Al oxide ceramics)
- composites and fibre-reinforced composites (FRC)

Benefits:

- ✓ Reliable performance in adhesive cementation
- ✓ Wide range of applications
- ✓ Varied selection of shades

Monobond Etch & Prime®

Monobond Etch & Prime® is a single-component ceramic primer that allows **glass-ceramic surfaces** to be etched and silanated in one easy step.

Areas of application:

Conditioning of glass-ceramic surfaces for the adhesive bond with luting composites

Benefits:

- ✓ Eliminates the unpopular etching of the glass-ceramic surface with hydrofluoric acid
- ✓ The glass-ceramic is etched and conditioned in one step
- ✓ A reliable bond to the adhesive is established

Delivery forms

Refill	1 x 5 g	673026WW
--------	---------	----------

Monobond® Plus

Single-component bonding agent for all indirect restorative materials

Areas of application:

Single-component bonding agent for all indirect restorative materials (glass- and oxide ceramics, metal, composite, fibre-reinforced composite). It generates a sound bond between the restoration and the cementation material.

Delivery forms

Refill	1 x 5 g	626221
--------	---------	--------

Ivoclean®

Universal cleaning paste especially designed for removing contaminants, in particular proteins, from restoration surfaces after intraoral try-in.

Areas of application:

Extraoral cleaning of pre-treated ceramic and metal restoration surfaces

Delivery forms

Refill	1 x 5 g	637568
--------	---------	--------

Liquid Strip

Glycerine gel to prevent the oxygen-inhibited layer of composites when seating composite or ceramic restorations.

Areas of application:

- Try-in paste
- Preventing an inhibited layer with composites
- Protecting the etching pattern of lab-fabricated all-ceramic restorations

Delivery forms

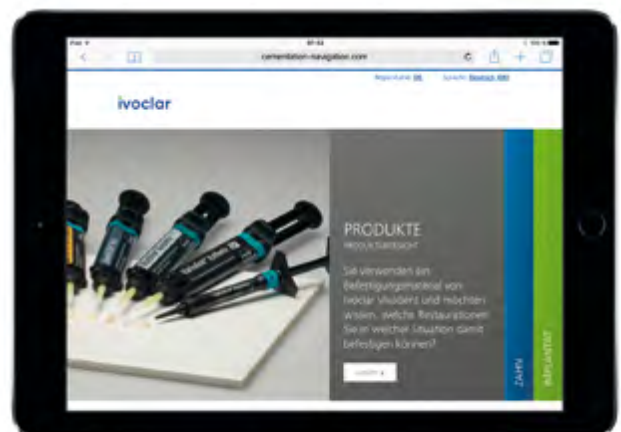

Refill	1 x 2.5 g	532505
Liquid Strip application tips	20x	533666

Cementation Navigation System

The Cementation Navigation System helps you to find the most suitable luting material for almost any cementation problem, irrespective of the substrate: tooth structure or implant abutments.

In addition, CNS shows all the benefits offered by the luting cements from Ivoclar.

Clear and detailed animations give you a comprehensive tour of the procedure, starting with removal of the temporary restoration and ending with topical fluoride application.

cementation-navigation.com

Ceramic, crystallization and sinter furnaces

Programat® CS2

The Programat® CS2 is the ideal firing and crystallization furnace for dentists. The furnace has been specially developed for the crystallization of IPS e.max® CAD restorations. The Programat CS2 is easily operated by means of the new colour touchscreen display and the proven membrane-sealed keypad. It is furthermore equipped with 20 individual programs as well as predefined Ivoclar programs, such as the Speed program, which crystallizes IPS e.max CAD restorations in less than 15 minutes.

The new and modern operating concept and the QTK2 muffle technology are only two of the many new innovations featured in the Programat CS2. The QTK2 muffle technology ensures an even more homogeneous heat distribution in the firing chamber, leading to optimum firing results and a prolonged life cycle of the heating element. Additionally, the new vacuum pump control system with double valve technology ensures noiseless and power-saving operation of the vacuum pump.

Technical data

Voltage	200 – 240 V / 50–60 Hz 110 – 120 V / 50–60 Hz 100 V / 50–60 Hz
Dimensions (closed)	Depth: 465 mm Width: 305 / 410 mm (incl. cooling tray) Height: 320 mm
Usable size of the firing chamber	ø 90 mm Height: 80 mm
Maximum firing temperature	1200 °C

Benefits:

- ✓ Colour touchscreen in combination with the proven membrane-sealed keypad
- ✓ QTK2 muffle technology with SiC bottom reflector
- ✓ Operating concept specially developed for the dental practice
- ✓ Automatic double-range calibration (ATK2)
- ✓ Remote diagnostics through the Internet via e-mail and data log files
- ✓ Software update via USB flash drive
- ✓ Integrated power-save function (Power-Save Technology)
- ✓ OSD display
- ✓ Modern, ergonomic design
- ✓ Software update via USB flash drive
- ✓ Modern interfaces (USB, ethernet, SD card reader)
- ✓ Large cooling tray
- ✓ Integrated tong holder
- ✓ 20 individual firing programs
- ✓ Double-valve vacuum technology
- ✓ Removable furnace head
- ✓ Power Fail Save System

* other voltage versions available

Programat® CS6

The Programat® CS6 is a combination furnace for the quick sintering, crystallization and glazing of dental ceramic materials. Due to the innovative firing chamber technology, restorations made of blocks up to size B55 can be processed in a short amount of time. The new opening mechanism optimizes and accelerates the pre-drying process with the warm air rising from the firing chamber and drying the restoration from below. The compact firing chamber and the new opening mechanism substantially reduce the program times for Ivoclar materials, which, in turn, reduces the processing time in the dental office to a minimum.

With the vacuum during the sintering process, which is unique in the dental world, the program times for IPS e.max ZirCAD materials can be clearly shortened. At the same time, the esthetic appearance of the restorations is considerably higher compared to that produced by other chairside furnaces. In addition to pre-installed programs for Ivoclar materials, programs for materials from other manufacturers can also be created easily.

Benefits:

- ✓ Combination furnace for the quick sintering, crystallization and glazing
- ✓ Superspeed crystallization program
- ✓ Vacuum for sintering programs
- ✓ Colour touchscreen in combination with the proven membrane-sealed keypad
- ✓ DSA – Digital Shade Assistant
- ✓ Compact design
- ✓ Temperature calibration on location possible
- ✓ OSD display (optical status display)
- ✓ 30 individual firing programs
- ✓ Programat WLAN kit for wireless data transfer
- ✓ Software update via USB flash drive

Delivery forms

Programat® CS6	110 – 240 V/50 – 60Hz	742087
Programat CS6, power cord, vacuum hose, object tray, IPS Speed Tray, tweezers, Temperature Checking Set Starter Kit, network cable, Short Instructions, Programat WLAN kit, A-D shade guide, DSA holder kit, var. accessories		

VP5 vacuum pump

The high-performance VP5 vacuum pump has been especially developed for the Ivoclar ceramic and press furnaces. The pump features a very high delivery rate. In addition, it is characterized by a distinct design and a carrying handle for convenient relocation.

Technical data

Voltage	220–240 V / 50–60 Hz
	200 V / 50–60 Hz
	115 V / 50–60 Hz
	100 V / 50–60 Hz
Power consumption	80 Watt
Final vacuum	approx. 20 mbar

Delivery forms

VP5 vacuum pump (white)	230 V/ 50–60 Hz*	666308
VP5 vacuum pump	1x	
Sound absorber	1x	
Vacuum Pump Filter Kit	1x	
* other voltage versions available		

VP3 easy vacuum pump

The small and light-weight VP3 easy vacuum pump is suitable for the evacuation of the firing chamber of the Ivoclar ceramic furnaces. This vacuum pump is not suitable for press furnaces.

The VP3 is a diaphragm pump that is characterized by low weight and extremely small dimensions.

Technical data

Voltage	230 V / 50–60 Hz
	200 V / 50–60 Hz
	115 V / 50–60 Hz
Power consumption	70 Watt
Dimensions	W 140 x H 130 x D 210 mm
Final vacuum	approx. 40 mbar

Delivery forms

VP3 easy vacuum pump (grey)	230 V/ 50–60 Hz*	594554
VP3 easy vacuum pump	1x	
Sound absorber	1x	
Vacuum Pump Filter Kit	1x	
* other voltage versions available		

Vacuum Pump Filter Kit

The vacuum pump filter kit protects the vacuum pump from contamination.

Delivery forms

Vacuum Pump Filter Kit	680188
Vacuum Pump Filter Kit	1x
Vacuum hose 200 mm	1x

Sinter furnace temperature checking set MTH (1500 °C)

10 sinter rings to check the exact sintering temperature of the Programat CS6.

Delivery forms

Refill sinter furnace temperature checking set MTH (1500 °C/2732 °F)		627398
Sinter rings	10x	
Conversion table	1x	

Sinter furnace temperature checking set UTH (880°C)

10 sinter rings to check the exact sintering temperature of the Programat CS6.

Delivery forms

Refill sinter furnace temperature checking set UTH (880 °C)		688632
Sinter rings	10x	
Conversion table	1x	

Sinter furnace temperature checking set starter kit

The temperature checking set starter kit comprises all the components necessary to check and calibrate the sinter temperature of the Programat® S1, Programat S1 1600 and Programat S2.

Delivery forms

Sinter furnace temperature checking set, starter kit		627380
Sliding caliper	1x	
Sinter ring	5x	
Conversion table	1x	

Programat® calibration measuring aid

The Programat® calibration measuring aid supports users in measuring the control rings and provides them with a reliable measuring result as a basis for the furnace calibration.

Delivery forms

Programat® calibration measuring aid	1x	752035
--------------------------------------	----	--------

Programat® CS6 object tray

On the object tray of the Programat® CS6, restorations are placed in the firing chamber. The tray is also used for cooling down zirconia restorations outside the firing chamber.

Delivery forms

Programat® CS6 object tray	1x	746379
----------------------------	----	--------

Programat® CS6 tweezers

The special tweezers with the ceramic tips are used to load the furnace.

Delivery forms

Programat® CS6 tweezers	1x	749897
-------------------------	----	--------

Automatic Temperature Checking Set ATK 2

The Automatic Temperature Checking set ATK2 is used to check and adjust the firing temperatures in furnaces with automatic calibration programs for the ATK2 system (e.g. Programat® P500, P510, P700, P710, CS, CS2, CS3, EP 3000, EP 3010, EP 5000, EP 5010 including Programat G2 devices).

The simultaneous double-range calibration is a special feature of the ATK2.

Delivery forms

Automatic Temperature Checking Set ATK 2	598833
ATK2 sample	5x

Firing tongs

These firing tongs are used to place objects in the firing chamber. High precision and excellent material quality are the special features of these tongs.

Delivery forms

Firing tongs	1x	530665
--------------	----	--------

Digital Shade Assistant starter kit

The Digital Shade Assistant starter kit is designed specifically to help users get started in digital shade selection and includes the components required for this. The Digital Shade Assistant holder provides convenient placement of the shade guide teeth.

Delivery forms

Digital Shade starter kit	679917
Digital Shade Assistant holder	3x
A-D shade guide	1x

Digital Shade Assistant holder kit

The Digital Shade Assistant holder provides placement of the shade guide teeth for the DSA function.

Delivery forms

Digital Shade Assistant holder kit	679916
Digital Shade Assistant holder	2x

Temporary restorations

Telio® Link

Dual-curing, translucent, temporary composite cement for the esthetic and provisional cementation of temporary restorations.

Areas of application:

Temporary cementation of provisionals:

- Crowns and bridges
- Inlays and onlays
- Veneers

Benefits:

- ✓ Eugenolf-free
- ✓ Dual-curing
- ✓ High esthetics due to two translucent shades
- ✓ Ideal retention behaviour
- ✓ Easy handling due to the automix double-push syringe

Shades:

A3 and Transparent

Delivery forms

Refill Telio® Link	2 x 6 g	
Double-push syringe, 1:1, var. accessories		
A3		701957
Transparent		701958
Refill mixing tips	50x	645951

Telio® Desensitizer

A clear solution for application onto dentin for reducing and preventing dentinal hypersensitivity and post-operative sensitivity.

Areas of application:

Prevention and reduction of dentinal hypersensitivity and post-operative sensitivity for the following fields of application:

- Temporary restorations
- Luting/cementation of indirect restorations
- Direct restorative treatment

Benefits:

- ✓ Total working time of 10 seconds; no light-curing required
- ✓ License for treatment planning and material selection; no interaction with the materials used in the further treatment steps
- ✓ Reduction of dentinal hypersensitivity and post-operative sensitivities
- ✓ Cleaning of cut dentin surfaces

Delivery forms

Refill Telio® Desensitizer		
Bottle	1 x 5 g	701959
Single Dose unit	1 x 0.1 g	701960

Telio® Inlay

Telio® Inlay is a light-curing, single-component temporary restorative material.

Areas of application:

- Deep inlay preparations with parallel walls
- Reversible obturation of screw access holes in implant superstructures

Benefits:

- ✓ Light-curing, single-component material
- ✓ Quick and easy application, removal in one piece
- ✓ No additional temporary cement or adhesive required
- ✓ Bonds to the tooth but does not stick to the instrument
- ✓ Demonstrates low polymerization shrinkage
- ✓ Seals tooth cavities effectively and shows no discolouration
- ✓ Available in two different shades and presentations (syringes and Cavifils)

Shades:

Transparent and Universal

Delivery forms

Refill Telio® Inlay syringe	3 x 2.5 g	
Universal		701261
Transparent		701265
Refill Telio® Inlay Cavifil	30 x 0.25 g	
Universal		701263
Transparent		701267

Telio® Onlay

Telio® Onlay is a light-curing, single-component temporary restorative material.

Areas of application:

- Wide, shallow cavities with few retentive areas, such as onlay preparations
- Reversible obturation of screw access holes in implant superstructures

Benefits:

- ✓ Light-curing, single-component material
- ✓ Quick and easy application, removal in one piece
- ✓ No additional temporary cement or adhesive required
- ✓ Bonds to the tooth but does not stick to the instrument
- ✓ Demonstrates low polymerization shrinkage
- ✓ Seals tooth cavities effectively and shows no discolouration
- ✓ Available in two different shades and presentations (syringes and Cavifils)

Shades:

Transparent and Universal

Delivery forms

Refill Telio® Onlay syringe	3 x 2.5 g	
Universal		701266
Transparent		701262
Refill Telio® Inlay Cavifil	30 x 0.25 g	
Universal		701268
Transparent		701264

Core build-up materials

MultiCore® Flow

Self-curing composite core build-up material with light-curing option.

Two curing methods and four shades provide an optimum foundation for the reconstruction of vital and non-vital teeth with part or most of the clinical crown missing.

Indications:

Core build-up of vital and non-vital teeth

Benefits:

- ✓ Based on Ivoclar's long-term experience in the field of composite technology
- ✓ A suitable option for every case: self- or light-curing
- ✓ Four different shades

Shades:

Light, medium, blue and white

Delivery forms

Refill MultiCore® Flow Automix syringe	1 x 10 g	
Var. accessories		
Light		604166
Medium		604167
White		604168
Mixing Tips small	10x	683287
Intra Oral Tips small	10x	604210
Root Canal Tips/Mixing Tips	5x each	645955
Refill MultiCore® Flow cartridge	1 x 50 g	
Var. accessories		
Light		578913
Medium		578914
Blue		578915
Dispenser	1x	579094
Mixing Tips	50x	579096
Intra Oral Tips	50x	579095

Services

Service+

Service+ is an outsourcing partner for every laboratory and offers products and services for the dental CAD/CAM world of Ivoclar. With a focus on scanning and design, Service+ provides support for dental laboratories in this time of increasing digitization.

The production or order of self-designed restorations made from Ivoclar digital materials is possible for all laboratory customers (requirement: open STL data). Our product portfolio covers fixed, removable and implant prosthetics.

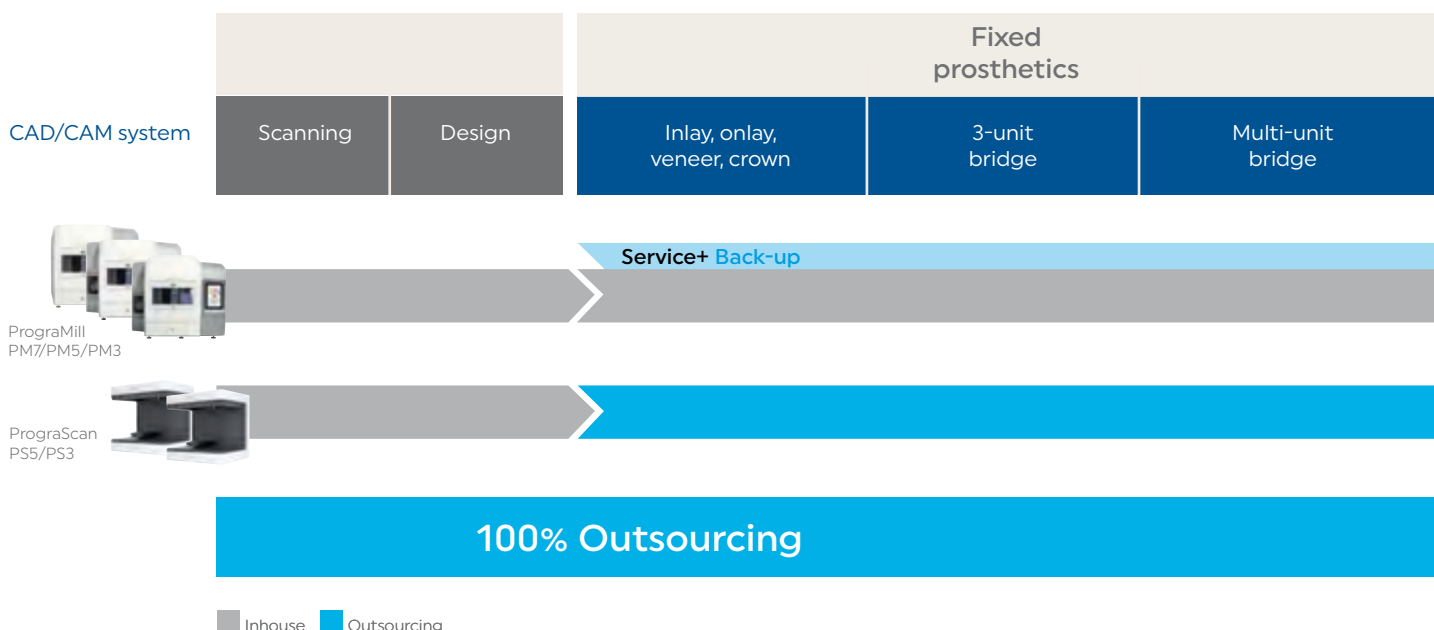

The products and services of Service+ allow the level of investment and CAD/CAM equipment utilization to be ideally tailored to the specific needs of the lab.

The outsourcing partner for your lab

Service+ supports you in your everyday lab work with products and services whenever needed. We provide you with easy access to the world of dental CAD/CAM from Ivoclar and offer you a versatile field of applications and a wide range of materials and milling services as well as a back-up service for your PrograMill unit in the case of maintenance work.

Service+ Back-up

Investing in a PrograMill milling machine can increase the lab's efficiency and profitability. Service+ Back-up provides the reliability needed for successful production. Digital manufacturing jobs can be seamlessly transferred in the case of maintenance or repair work. The milling centre will handle the digital production of your restorations until your PrograMill is back up and running again.

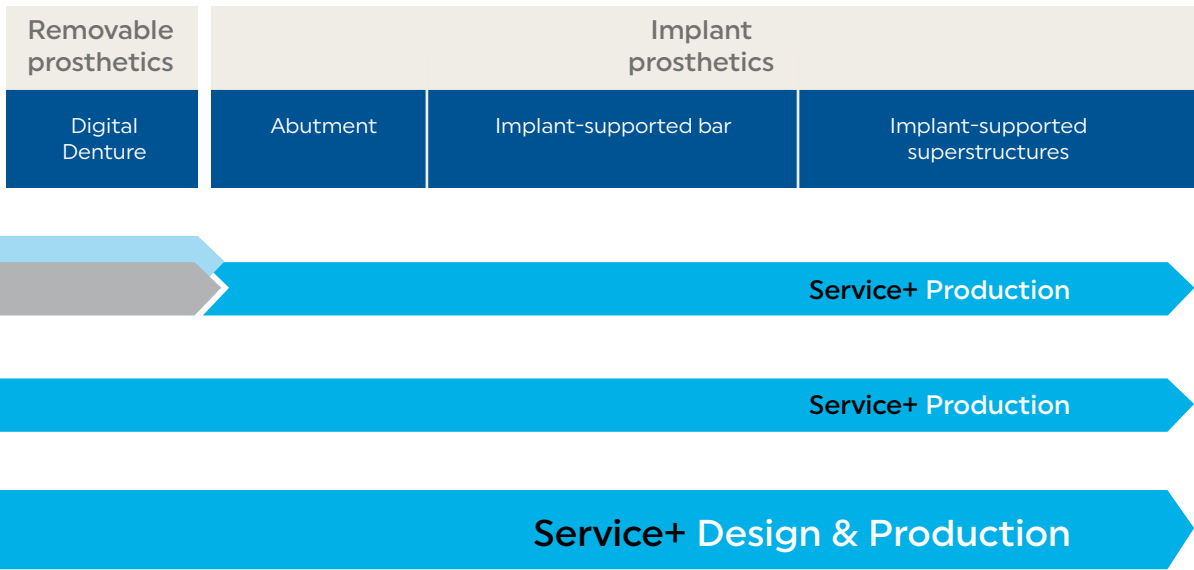

Service+ Production

Service+ Production is designed for all dental labs that are already using their own scanning devices and design software. Labs using design software from 3Shape, DWOS or exocad will be able to take advantage of a comprehensive range of materials and applications for fixed, removable and implant-supported prosthetics. Labs using their own CAD/CAM equipment can enhance the economic efficiency of their own production facilities by having e.g. complex restorations manufactured with the help of Service+.

Service+ Design & Production

Service+ Design & Production provides you easy access to the digital applications of Ivoclar. Forward your models and/or wax-ups or scans (open STL data format) to a Service+ centre. The milling centre will then digitize all information, design the restoration and manufacture it using the specified materials. You will be able to benefit from the extensive experience of our CAD/CAM specialists. This is particularly beneficial when implant-supported or complex indirect restorations are involved.

^[3] Up to the second premolar as the terminal abutment

Individual implant restorations

The implant manufacturers' most commonly used interfaces are available for the production of individual implant restorations. The Ivoclar CAD library also includes special geometries, such as a digital patrix (compatible with MK1®, Preci-Vertex® and Preci-Horix®). They have been specially developed to enable an optimal manufacturing process, including polishing.

The fitting accuracy of each implant-supported bar and bridge is carefully checked.
